

# Twitter API

## Why Twitter API?

- User has an excellent option to get registered/ Log In using his/her Twitter account details.
- The main purpose of Twitter API is User's Convenience, User does not have to provide or fill other details apart from their Twitter Username and Password.
- Twitter API provides Authentication and Security for User's personal details so it is totally secured.
- Using Twitter API Admin can obtain User's First Name, Last Name and Image.

## Steps to Create Twitter API

### Step -1

- User has to navigate <https://twitter.com/>

### Step -2

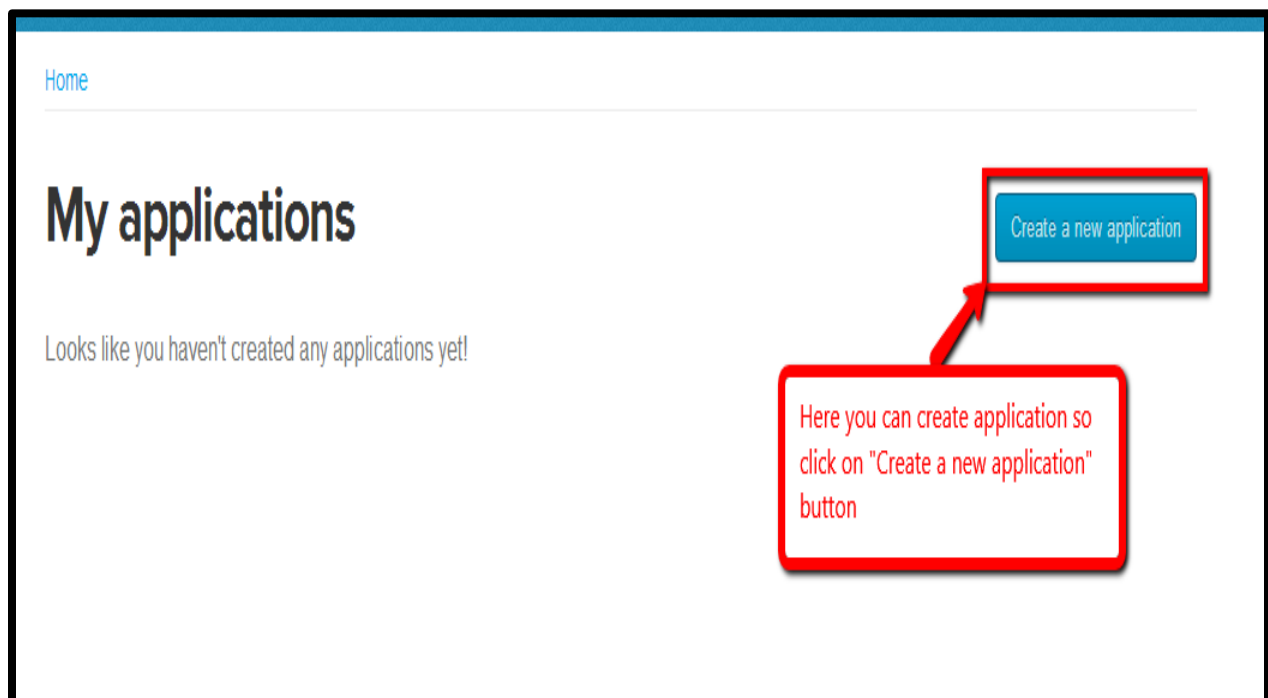

- User has to Login in with his/her Valid User Name & Password.

### Step -3

User has to navigate <https://dev.twitter.com/apps>

### Step -4

- Click on Create a new application button on My application page.

## Step -5

- User has to enter the required valid information.
- Click on the checkbox to Agree the conditions.
- User has to enter the exact security code.
- Click on Create Your Twitter Application button.

### Application Details

On this page set your all details, then check the checkbox for "Agree" & enter captcha code and click on "Create Your Twitter Application" button on same page.

**Name: \***

Demo

Your application name. This is used to attribute the source of a tweet and in user-facing authorization screens. 32 characters max.

**Description: \***

Twitter demo site

Your application description, which will be shown in user-facing authorization screens. Between 10 and 200 characters max.

**Website: \***

http://www.demo.com/Demo

Your application's publicly accessible home page, where users can go to download, make use of, or find out more information about your application. This fully-qualified URL is used in the source attribution for tweets created by your application and will be shown in user-facing authorization screens.  
(If you don't have a URL yet, just put a placeholder here but remember to change it later.)

**Callback URL:**

https://demo.com/

Where should we return after successfully authenticating? For [@Anywhere applications](#), only the domain specified in the callback will be used. [OAuth 1.0a](#) applications should explicitly specify their `oauth_callback` URL on the request token step, regardless of the value given here. To restrict your application from using callbacks, leave this field blank.

## Step -6

- User can obtain all the required details for the Admin site settings.
- Click on Create My Access Token to get more access.

### OAuth settings

Your application's OAuth settings. Keep the "Consumer secret" a secret. This key should never be human-readable in your application.

Access level	Read-only <a href="#">About the application permission model</a>
Consumer key	aSHedgV1EKJ3nDqtcFg
Consumer secret	YSfp2eSQT0zR5f9R2oCAdU20GvvvBqXACOTfhaJQ06
Request token URL	https://api.twitter.com/oauth/request_token
Authorize URL	https://api.twitter.com/oauth/authorize
Access token URL	https://api.twitter.com/oauth/access_token
Callback URL	https://demorockers.com/
Sign in with Twitter	No

**Your access token**

It looks like you haven't authorized this application for your own Twitter account yet. For your convenience, we give you the opportunity to create your OAuth access token here, so you can start signing your requests right away. The access token generated will reflect your application's current permission level.

Create my access token

After that you can get all the setting for API which you can use in your site admin.

And click on this button and get more settings.

- URL to return users to your app after they grant access.

## Step -7

- User has to Login to Admin Site with valid Username and Password to set the API settings.

groupfund.me

Admin Login
